THE WETROOM SPECIALIST

# SOHO

FROM IMPEY

**Our designers were inspired to create a utilitarian and raw aesthetic that reflects the progressive and on-trend warehouses and industrial buildings in Soho, Manhattan whilst still attaining the high-quality and luxury Impey design approach.**

The brand new Soho range by Impey creates the perfect urban-chic styling and brings a fresh and on-trend style to any bathroom, whether that be for the style savvy home-owner, the high-end property developer or the trend conscious hotelier. Soho's industrial simplicity translates through not only the matte black steel doors and framing,

but also through the low profile door handles, hidden hinges, subtly exposed industrialised screws as well as the hidden bracing bar fixtures – creating a high-end, seamless and highly engineered aesthetic.

All Soho screen options are 2100mm in height and come with 8mm easy clean safety glass. The matte-black framing is only to the exterior of the glass, therefore allowing easy cleaning to the interior glass without any physical barriers.
